Understanding the Need

THE SAN ANTONIO REGION IS GROWING,
AND SO ARE ITS TRANSPORTATION NEEDS.

7th

most populous city in the U.S.¹

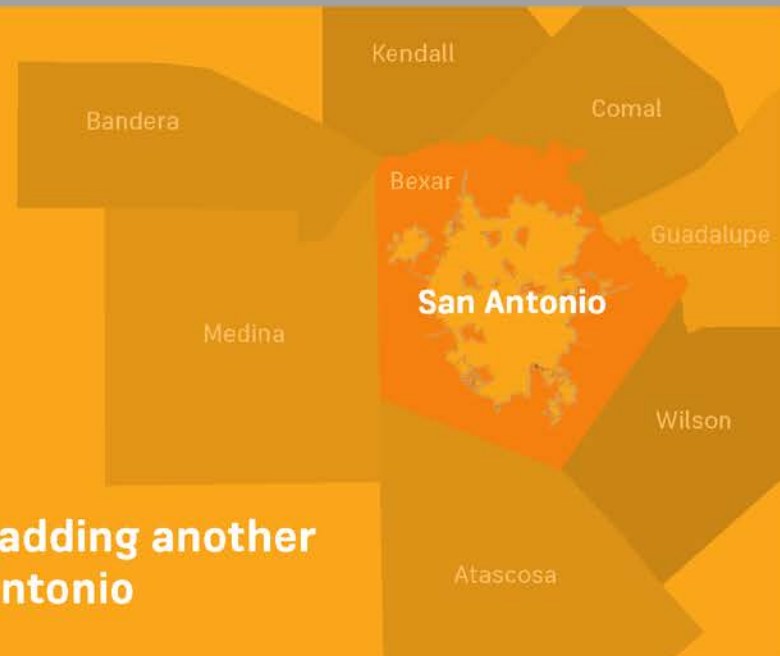

3rd

largest metropolitan area in Texas²

The region will add
1.6 million
 new residents between 2010 and 2040³

76%
 increase

This is equivalent to adding another city the size of San Antonio

1.6 million new residents is equivalent to 146 new residents arriving each day in the metropolitan area

PEOPLE

1.6 million

Equivalent to 23 Alamodomes.⁴

JOB

838,000+

300 Weston Centres would be needed to accommodate this many new jobs.⁵

CARS

1.3 Million

Loop 410 would have to be 68 lanes wide to fit this many vehicles.⁶

**VISION
2040**

Vision 2040 Survey Response

Milestone 1 – Survey Results

Frequency and Reliability

are the **most important**
features of VIA service regardless
of respondent demographics.

Transportation Choices (n=3,705)

What do you think will most improve public transportation in the San Antonio region? (% of those who answered the question choosing as top three)

Enhanced Local Service (51%)

Rail Service (49%)

Safe Routes to Transit (43%)

Milestone 1 – Survey Results

There is **high demand** for

**Fixed-Route,
High-Capacity service**

Nearly **one-quarter** of the map-based “new route” comments requested rail service between downtown San Antonio and the airport along the US-281/San Pedro Avenue corridor.

The ability to link

**Work, Shopping,
and Entertainment**

...via **transit or pedestrian access** (“live-work-play”) was a feature that would make transit a more convenient travel choice for thousands of respondents.

Milestone 1 – Survey Results

In general, community perspectives vary depending on the respondents' location within the 8-county San Antonio region.

Nonurban

Expanded Service Area,
Carpooling, Transit Priority

Transportation Choices
